Residential Guide

Built to last, designed for life.

PROFILE INCLUDING COVER E200 COLOUR Dulux Duratec Textured FlaxPod

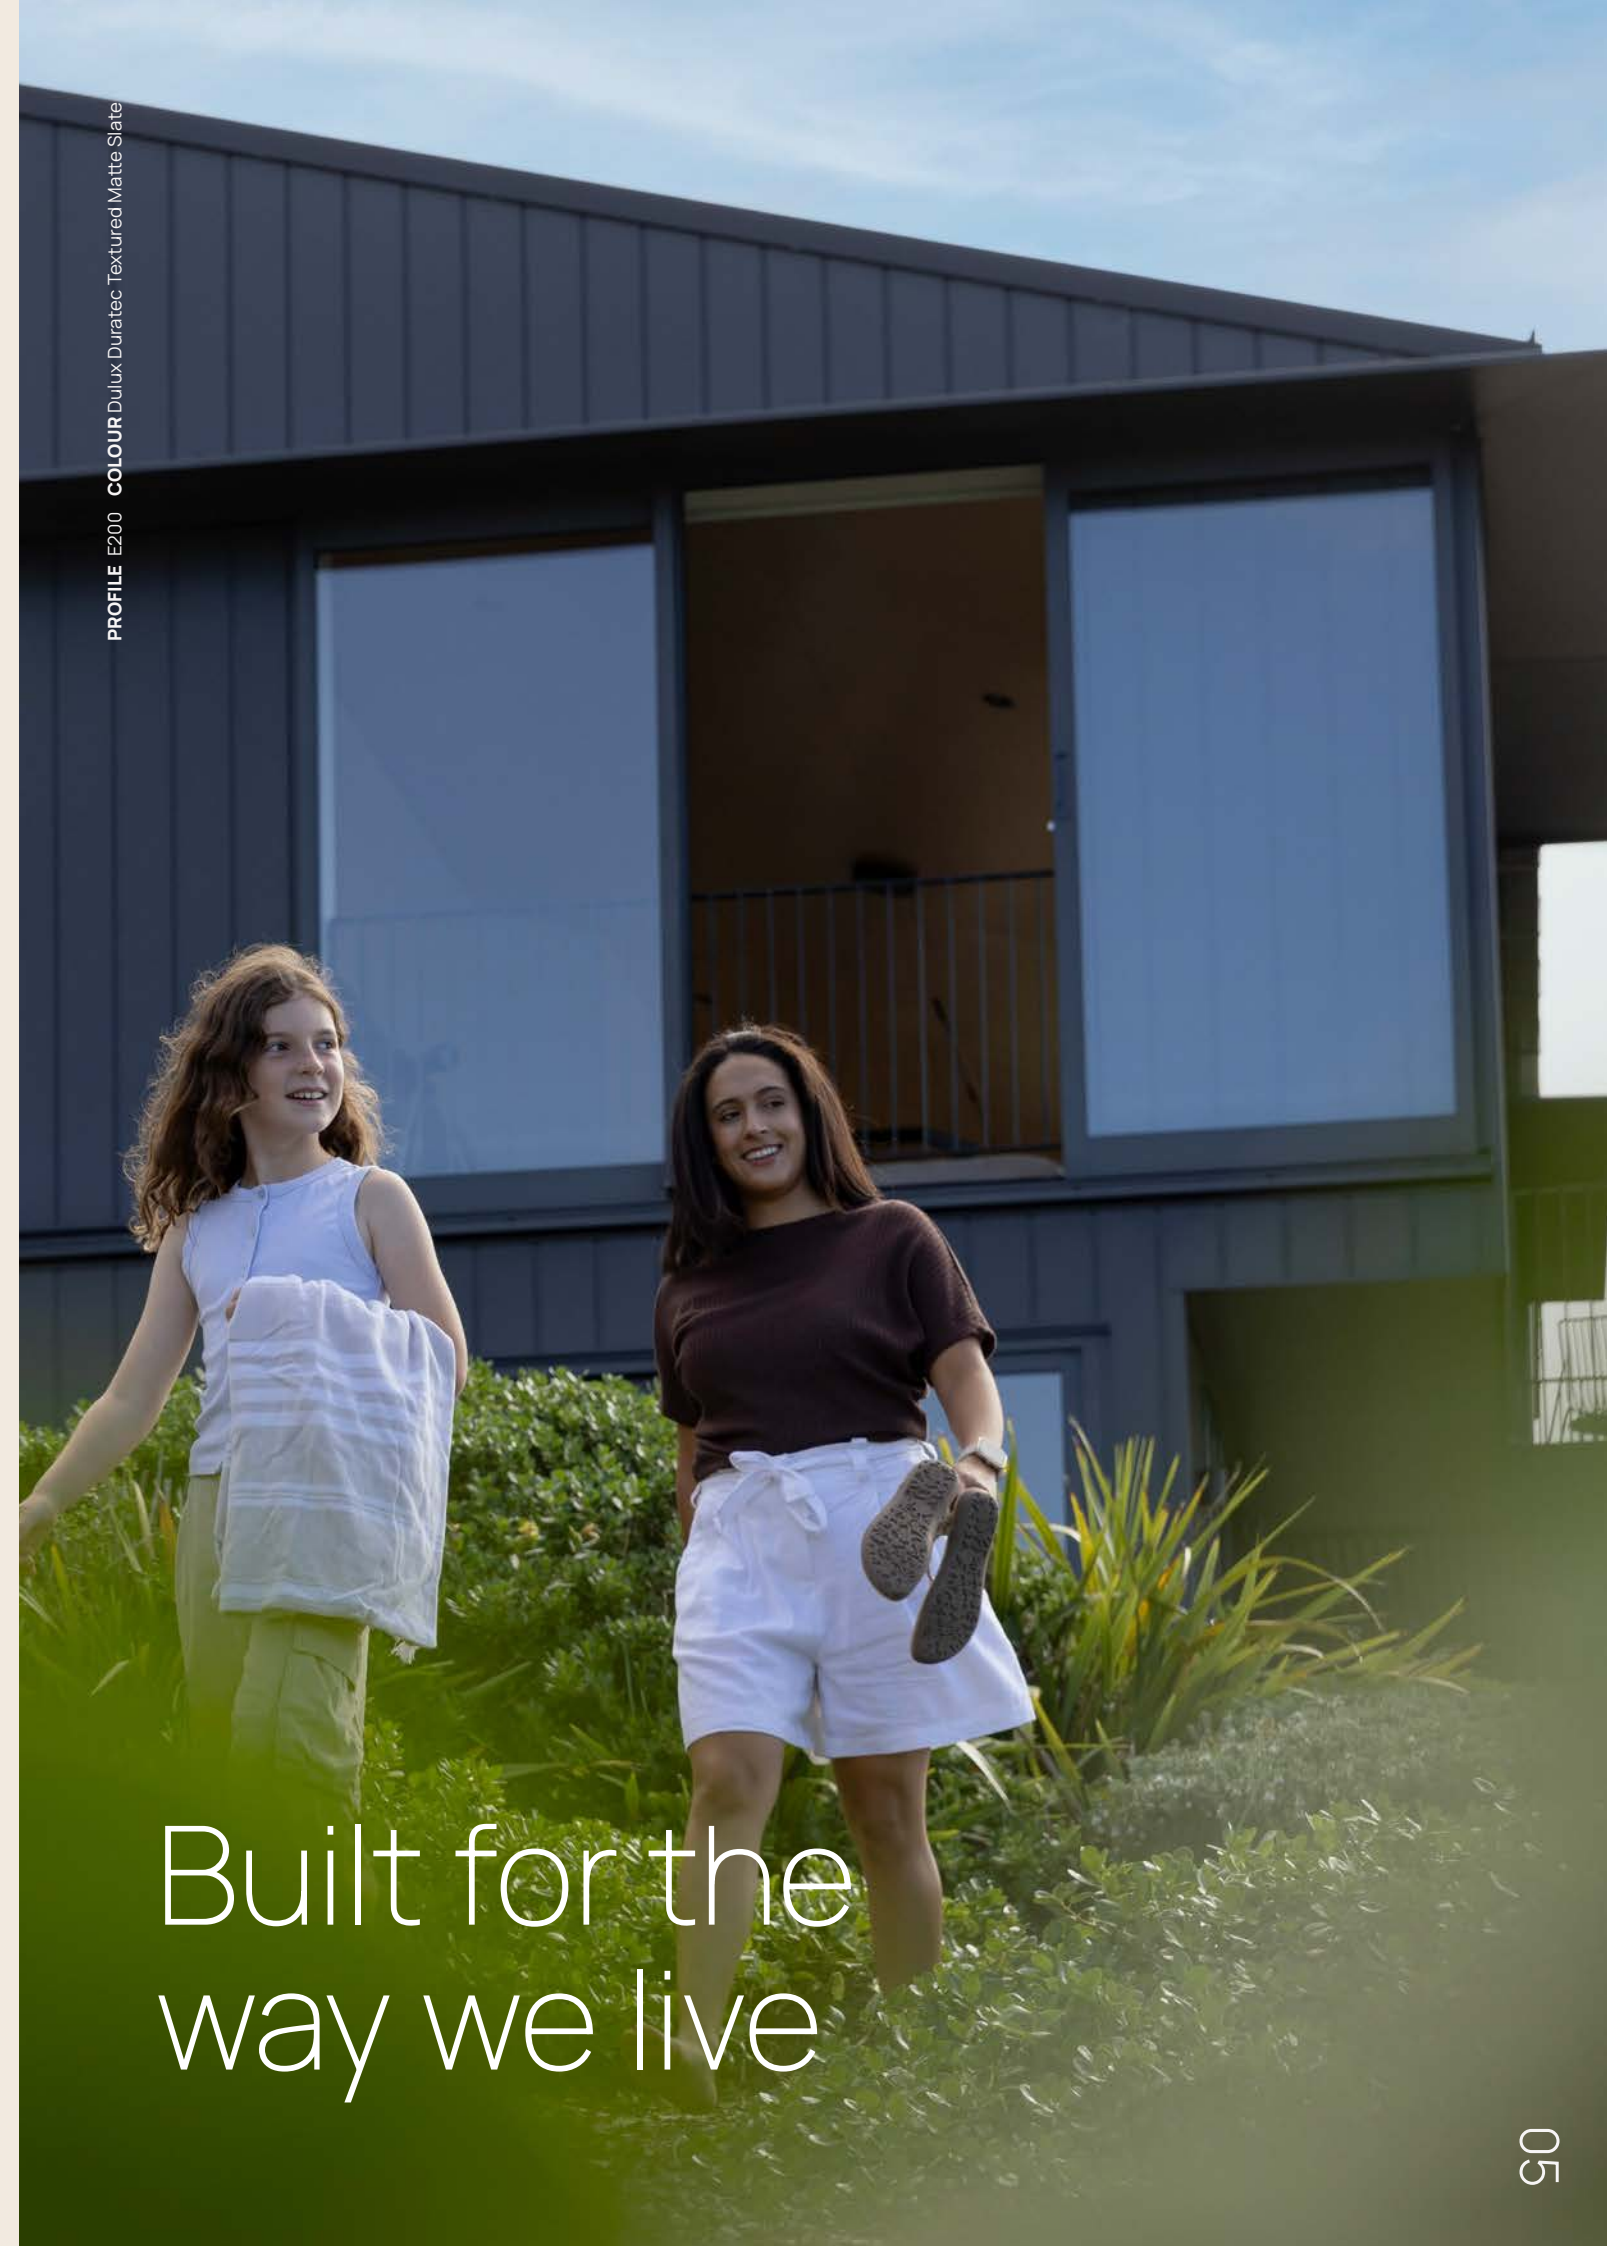

Your home isn't just where you live. It's where life happens.

The everyday, the unexpected, the best moments. That's why your cladding needs to do more than look good.

Nu Wall aluminium cladding is designed for New Zealand homes. It's made to handle the elements, simplify upkeep, and give you the freedom to live your life, your way.

Whether you're on the coast, tucked into the hills, or right in the heart of the city, Nu Wall works with your lifestyle and your landscape.

It's a smarter choice for the home you've always wanted and the life that happens inside it.

Built for the way we live

Smarter by nature

Some materials need constant upkeep. Others show wear too soon. Aluminium gives you the best of both worlds, natural durability and architectural style.

It won't rust, warp or crack, and it's designed to handle New Zealand's harsh sun, heavy rain and coastal conditions with minimal upkeep. Lightweight, durable and fully recyclable, it's a material built to perform for decades.

As part of a complete Nu Wall cladding system, aluminium helps protect your home while maintaining its appearance over time. Less maintenance, lasting performance and more time spent enjoying the place you call home.

Less to maintain, more to enjoy

Whether it's weekends away, time with family or simply one less thing to think about, Nu Wall gives you the freedom to enjoy your home, not spend your time maintaining it.

Peace of mind is a powerful thing. With Nu Wall, it's built in.

Nu Wall aluminium cladding is designed to remain strong, clean, and beautiful with minimal maintenance. No flaking paint. No patch repairs.

Just quiet, consistent performance that fits into the rhythm of daily life.

More time for what matters

The Benefits of Aluminium

More time for what matters

No repainting cycles. No ongoing upkeep. Just a home that looks after itself. Weekends stay yours, not a list of jobs waiting to be done.

Holds its look over time

Clean lines stay true. Finishes stay consistent. A home that continues to feel considered, not tired or worn.

Built to stay part of your life

Strong, stable and designed to endure without needing replacement. A home that stays with you and keeps working as life evolves.

Freedom to design without compromise

A wide range of profiles, colours and finishes gives you flexibility in how your home looks and feels. Create something that reflects you and keeps doing so over time.

Less to worry about

No warping, rotting or cracking over time. No gradual wear that needs constant attention. Confidence your home will keep performing without the stress.

Made for real conditions

Handles the salt, sun, wind and rain that New Zealand homes face every day. Wherever you live, your home is built to handle it.

A more considered choice

Long-lasting and recyclable, aluminium reduces the need for replacement and material waste. Better for your home now and what comes next.

Your home, your way

No two homes are the same. That's why Nu Wall offers the flexibility to create a home that feels right for you, your lifestyle and your surroundings.

From contemporary urban homes to coastal retreats and rural escapes, Nu Wall's range of profiles gives you the freedom to shape the character of your home. Clean lines, refined details and a choice of scales allow you to create an exterior that feels both personal and enduring.

Choose vertical or horizontal. Sharp or soft. Textured or smooth. With over a dozen profiles and the freedom to combine them, you can create a home that reflects who you are and where you live.

One system Nine families Endless possibilities

Nu Wall profiles offer a wide range of architectural expressions, from flat minimal panels to folded geometry, soft curves and traditional weatherboard forms.

From clean lines to bold seams, soft curves to classic weatherboards, Nu Wall profiles each have a distinct design language with their own character, allowing architecture to feel refined, expressive or timeless.

Behind every profile sits the same engineered aluminium system designed for durability and long-term performance.

It means the design freedom you want, with the reliability you need.

Profile Series

From clean lines to bold seams, soft curves to classic weatherboards, Nu Wall profiles each have a distinct design language.

Whether you're chasing minimal expression, traditional texture, or architectural shadowplay, there's a family that fits. All profiles install vertically or horizontally, and all belong to one fully integrated aluminium system, designed to perform and built to last.

Mono

Refined flat profiles with subtle shadow definition.

E Series

Flat, clean profiles with a sharp negative detail offering bold linear expression.

Standing Seam

Vertical standing seam profiles with architectural rhythm.

Random

Intentional variation created through mixed-width profiles.

Aero

Soft, curved forms that introduce movement and flow.

Iconic

Sculptural profiles designed to be seen and felt.

Contemporary

Strong geometry and crisp definition for modern architecture.

Louvre

A classic weatherboard language, reinterpreted with precision.

Legacy

Traditional weatherboard, re-engineered in aluminium.

Where surface brings the design to life

The profile defines the form. The finish defines how it's experienced.

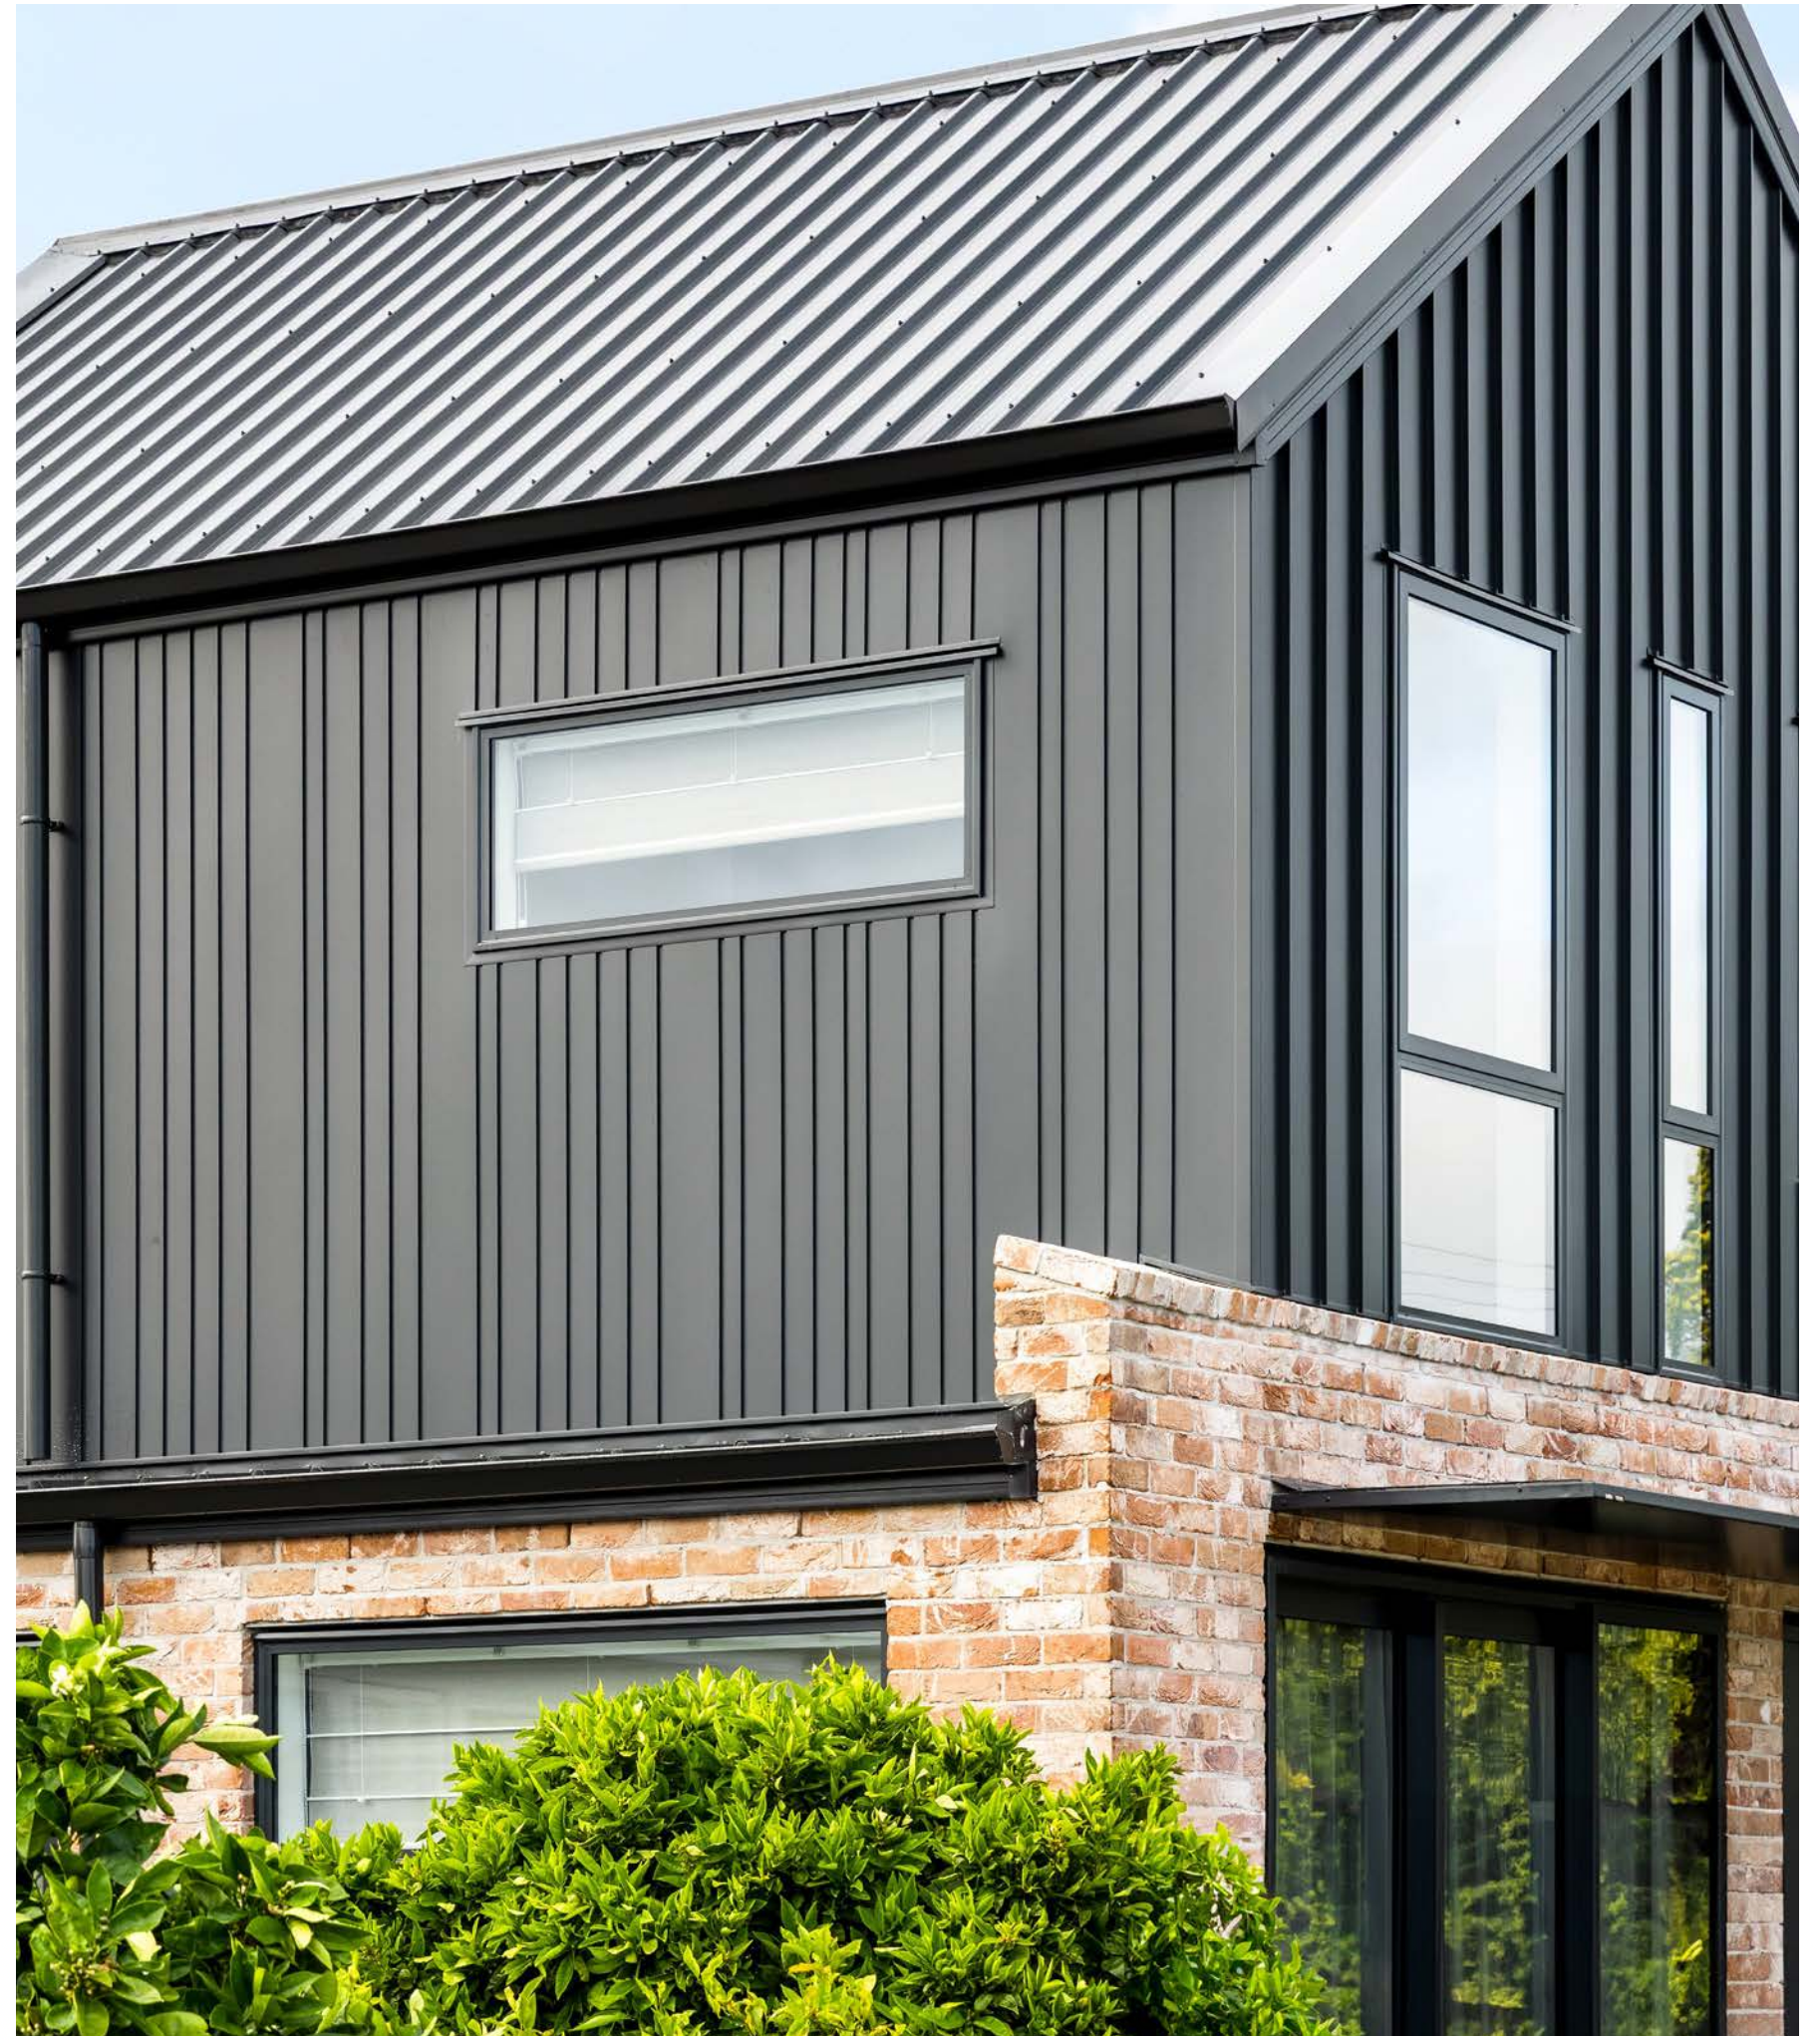

Light moves differently across every surface. Soft mattes absorb it. Metallics reflect it. Textures add depth and movement.

The right finish can sharpen lines, soften edges, or bring a subtle richness that changes throughout the day.

Nu Wall offers a wide range of finish options to suit how you want your home to look and feel. From smooth and low sheen through to textured mattes and light catching metallics, each finish adds its own character while being designed to handle real life.

Resistant to wear, less prone to visible marking, and designed to hold its appearance over time. Every finish is chosen not just for how it looks on day one, but for how it continues to perform.

Inspired by place.
Backed by
performance.

PROFILE E200 COLOUR Dulux Duratec Textured Matte Slate

Any Colour, Any Environment

Choosing a cladding colour isn't just about taste. It's about how that colour will live on your home, in your environment, over time.

New Zealand isn't gentle on materials. Salt in the air. Frost in the mornings. High sun reflecting off sand, concrete, or snow. Some colours and finishes hold up better in these conditions than others.

That's where our zone-based palettes come in.

They're not rules, just local insight based on how light, weather, and surroundings affect colour in the real world.

Whether you're coastal, alpine, deep in the bush or city side, you'll find tones that feel right and last well.

Urban

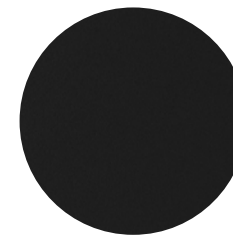

Hardwearing in the heart of it

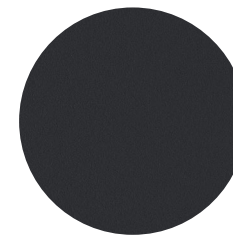

PROFILE E200 COLOUR Dulux Duraloy +Plus Matt Lignite

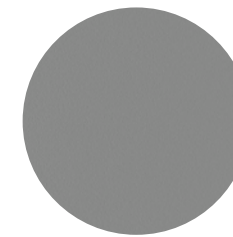

PROFILE E200 COLOUR Dulux Duratec Textured FlaxPod

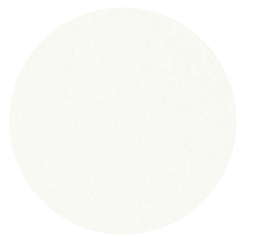

Textured Matte Black

Textured Grey Friars

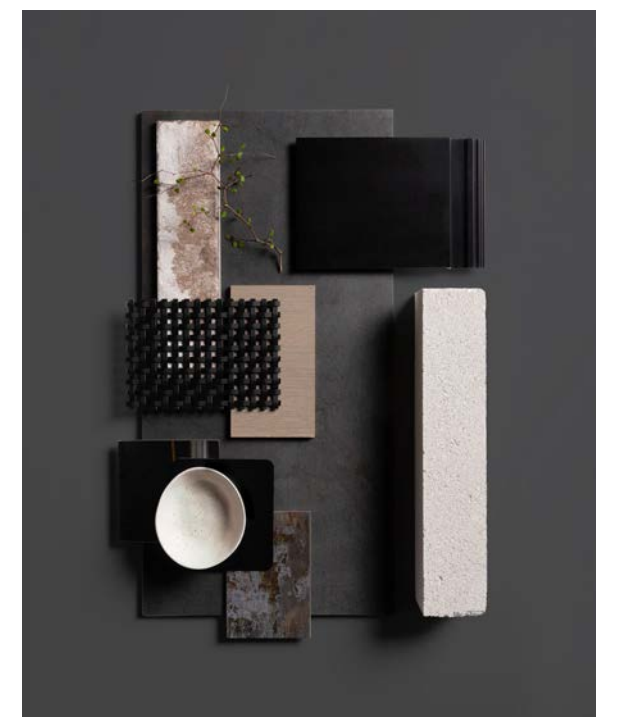

Textured Sandstone

Textured Warm White Pearl

The city builds a deal with high sun, frequent touch-points, and boundary-facing walls. Low-glare, textured finishes reduce visible marks and help keep your colour crisp.

PROFILE E200 COLOUR Dulux Duratec Textured Matte Black

Coastal

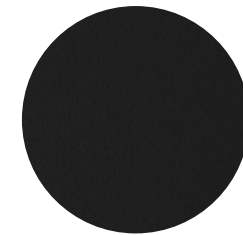

Built into the rhythm of salt and sun

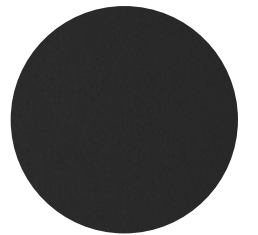

Textured Titania

Textured Silver Pearl

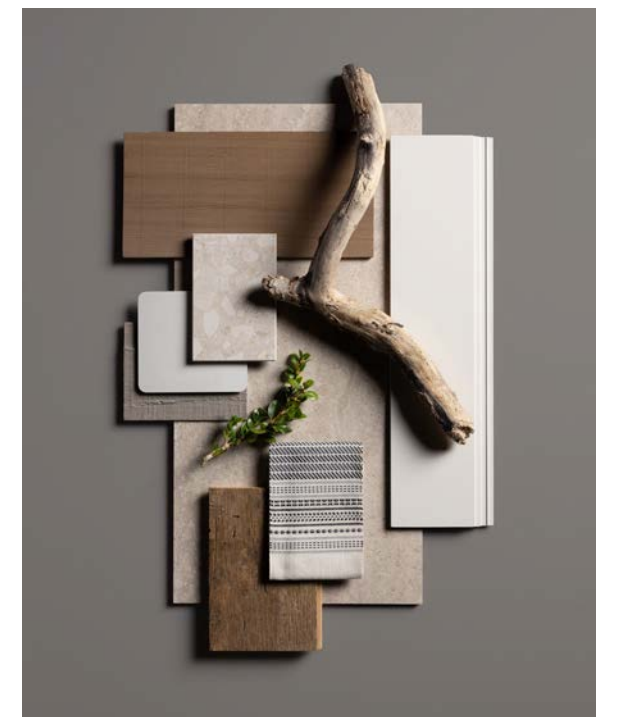

Textured Flaxpod

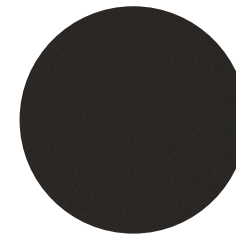

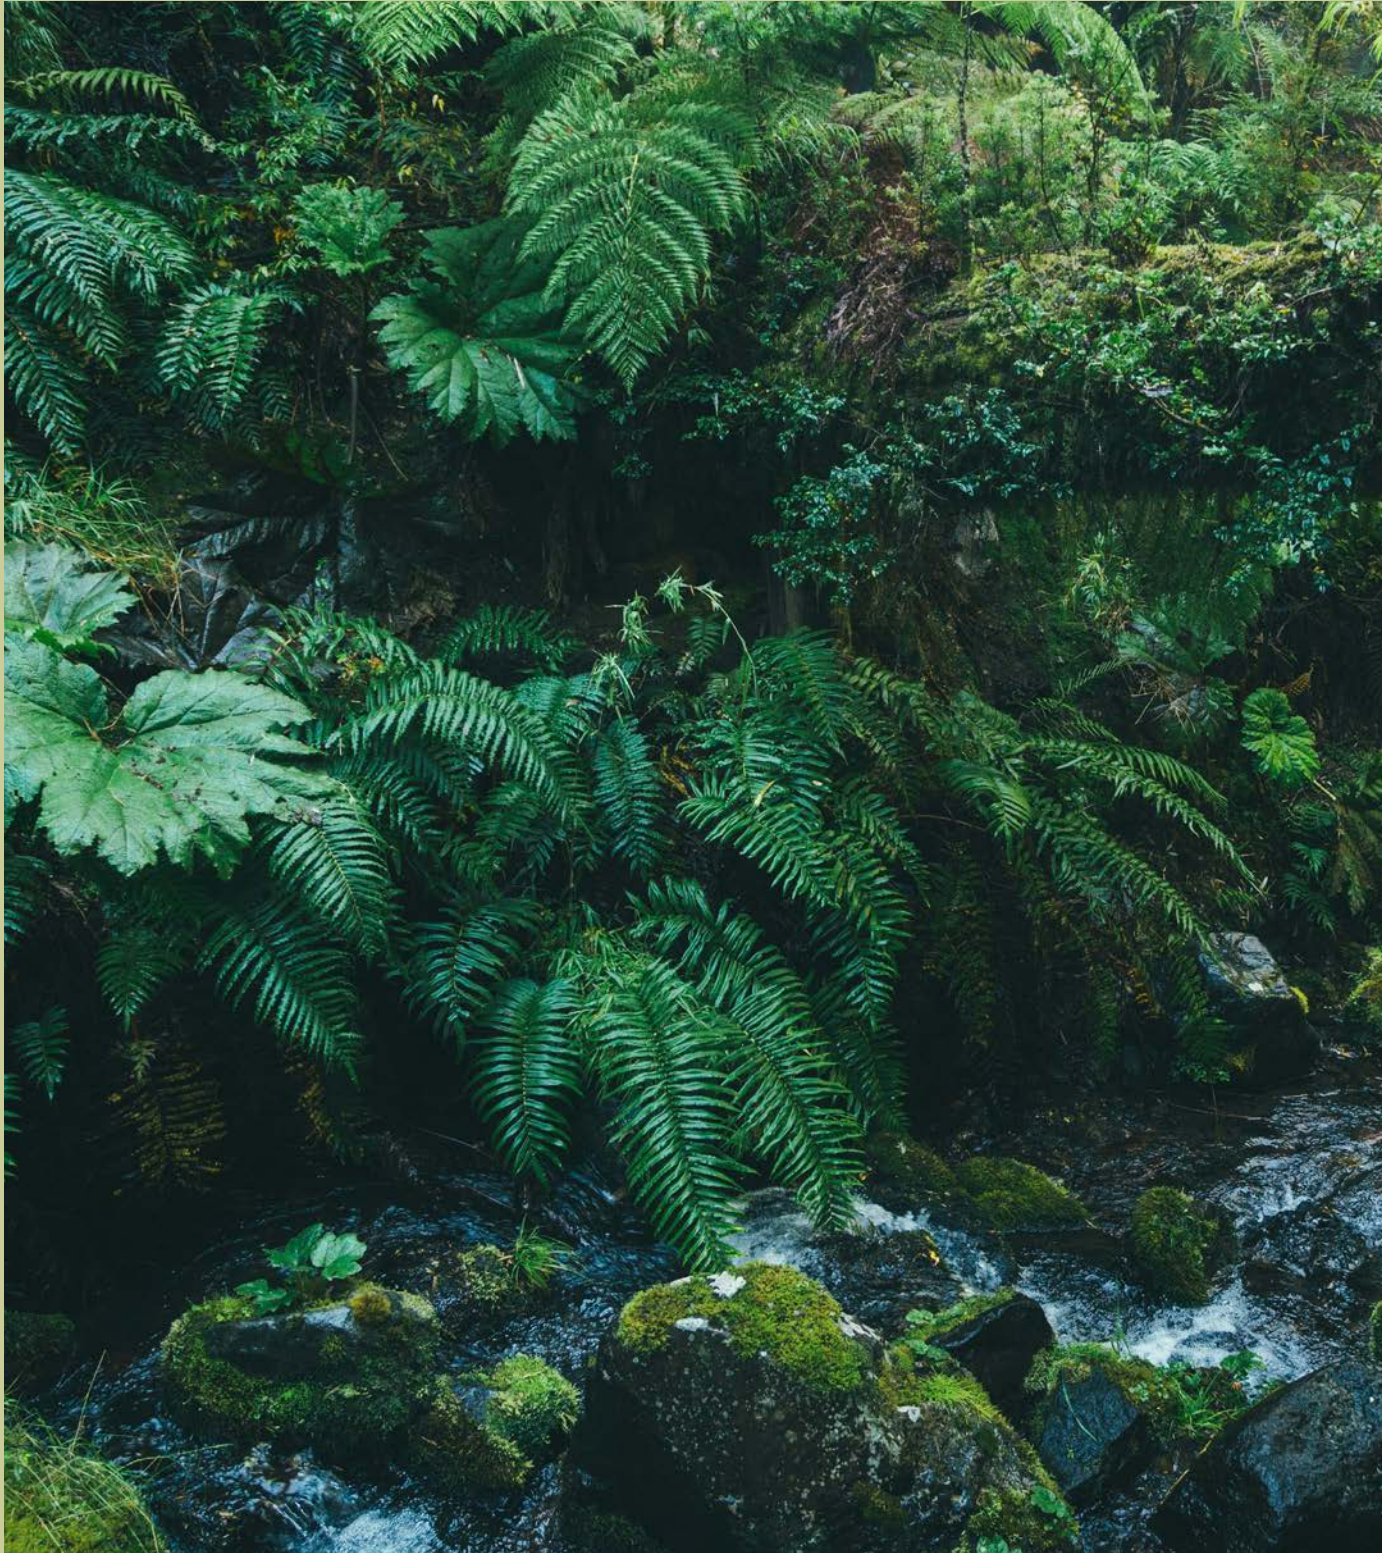

Sable Bass

Textured matt tones help conceal salt spray and reduce glare; light colours keep surface temps down.

Forest

Where bush, birdsong
and building meet

Textured Ironsand

Textured Dark Bronze

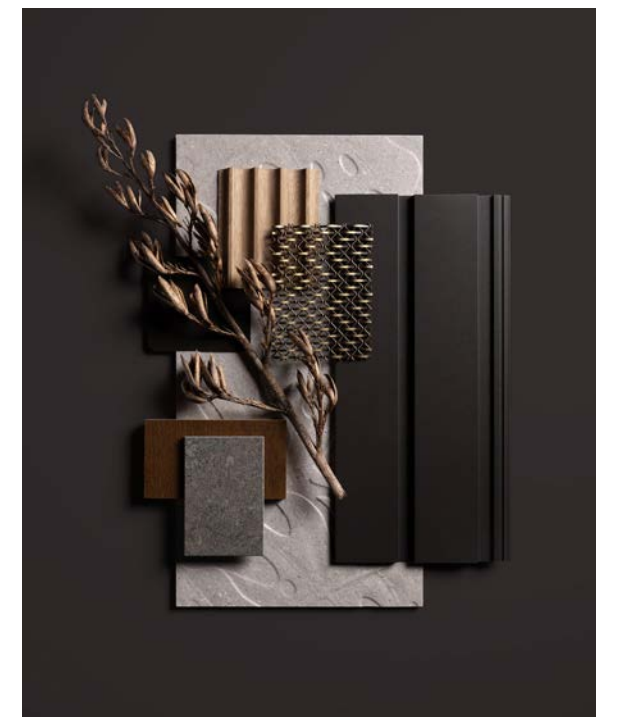

Weathered Steel

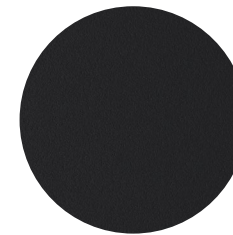

Textured Coal Dust

Earthy colours
and low-sheen
textures absorb
light and settle
quietly into rural or
wooded sites.

Alpine

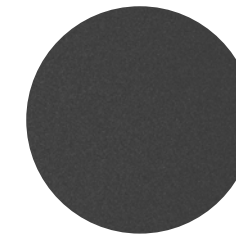

Built for altitude,
shaped by light

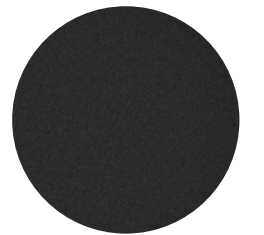

Textured Charcoal

Textured Medium Bronze

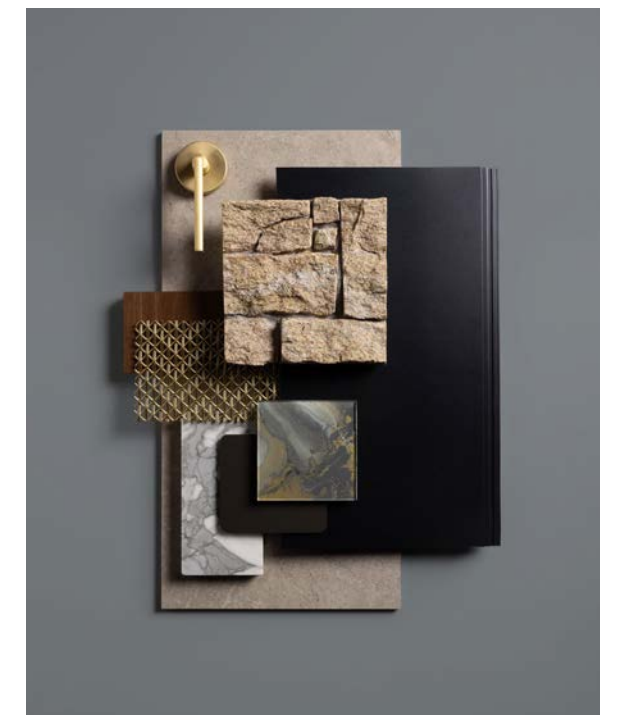

Rhodium

Textured Coal Dust

Low-reflectance
surfaces handle
sharp contrasts
and cold clarity
without glare.

Home-grown. Hands-on. Always here.

There's comfort in knowing the people behind your cladding live in the same country you do. They know the weather, the land and the lifestyle because they're living it too.

Nu Wall is New Zealand owned, made, and supported. It's built locally for the way we live by people who understand what our homes go through and what they mean to the people inside them.

We're close by if you need advice. Just down the road if something needs sorting. And always proud to be part of what you're building right here at home.

Enjoyed for Generations

PROFILE E70/130 COLOUR Dulux Duratec Textured FlaxPod

The true value of a home is revealed over time.

Long after construction is complete, the materials you choose continue to influence how your home performs, how much it demands from you and how much enjoyment it returns.

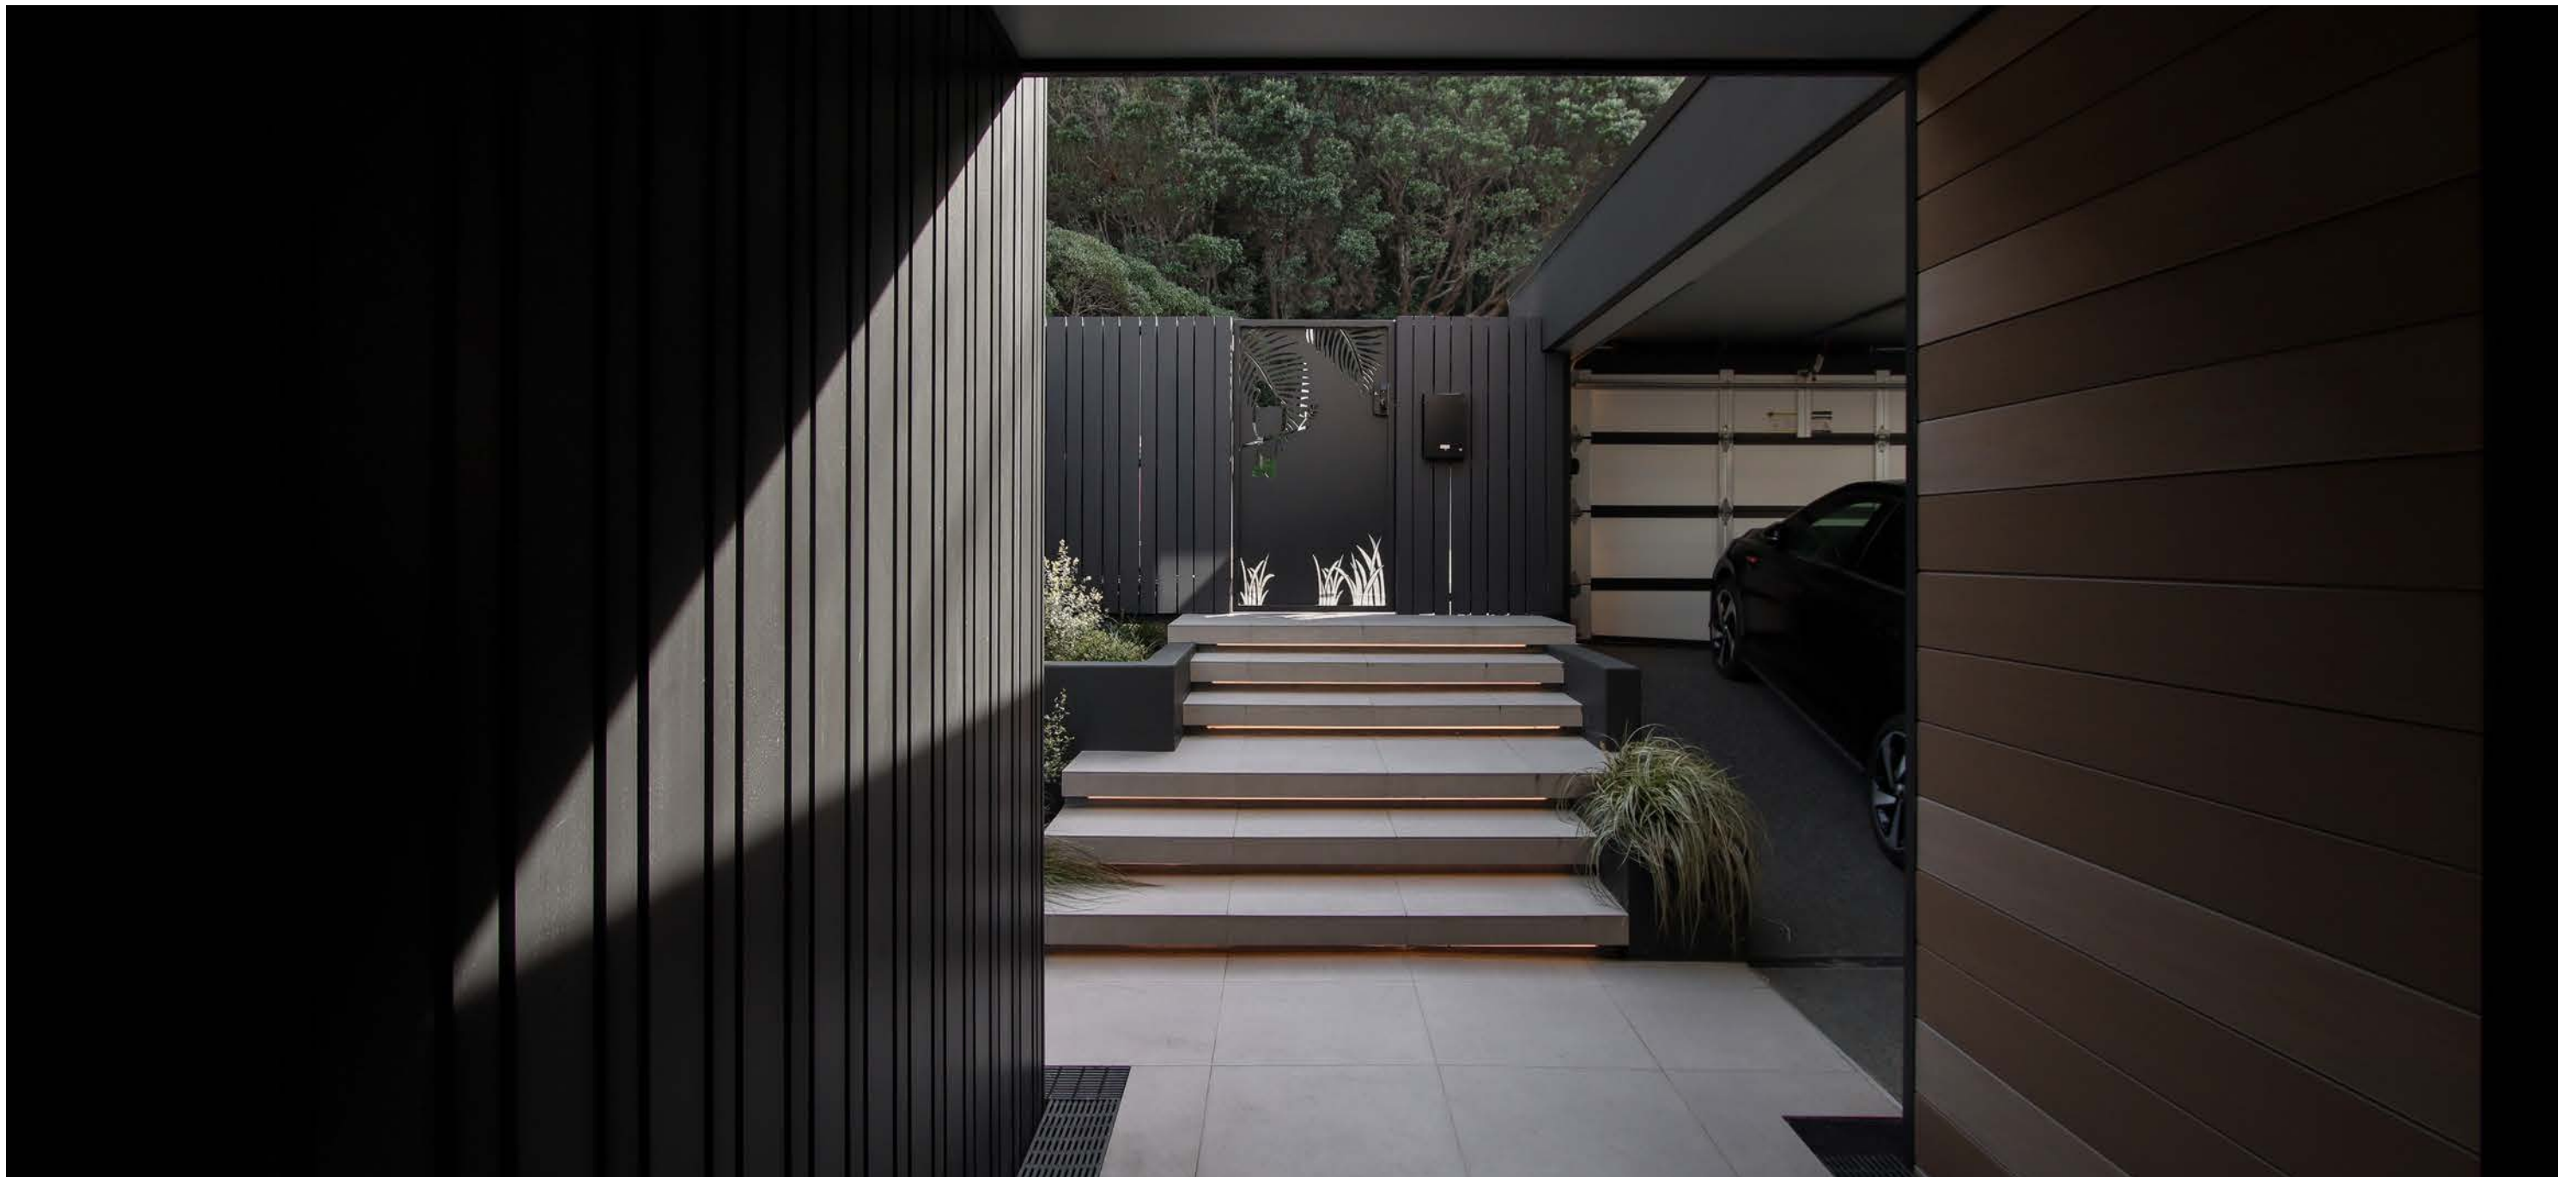

A low-maintenance home means more freedom to spend time where it matters most, with family, with friends and doing the things you love.

That's why Nu Wall is designed for lasting performance and long-term value. Helping homeowners reduce the demands of ownership while preserving the enjoyment of living well.

Because the best homes aren't measured by what they cost. They're measured by what they continue to give back over a lifetime.

Built to last. Designed to be lived in.

Enjoyed for generations.

Good design
considers what
comes next.

Sustainability built in

The materials you choose don't just shape your home. They shape the impact it leaves behind.

Nu Wall is made from aluminium, a material that can be recycled again and again without losing its strength or finish. Combined with long life performance, it reduces the need for replacement and supports a more responsible way to build over time.

It's a considered choice that looks ahead without compromising how your home looks or performs today.

With you from day one

Guidance you can rely on from first ideas to final result.

Building or renovating comes with a lot of decisions. We're here to make the cladding one of the easier ones.

From early ideas through to installation, we work alongside you, your designer and your builder to ensure everything comes together as it should.

Clear advice, practical support and a team you can rely on from start to finish.
